

LUDOVIC ROTHNEY FEUTSE NZIKO

FULL-STACK & MOBILE SOFTWARE DEVELOPER

ONTARIO, CANADA | (613) 818-3315 | ludovicfeutse@gmail.com
github.com/nidovic

PROFESSIONAL SUMMARY

Full-stack and mobile developer with five years of experience delivering cross-platform products, payment platforms, APIs, and offline-first systems. I work across Flutter and React interfaces, Go and Node.js services, cloud infrastructure, and automated delivery. Bilingual in English and French.

WORK EXPERIENCE

Software Developer

November 2022 - May 2026

Spreeloop | Kitchener, Ontario, Canada | Remote

Worked remotely across Spreeloop's Canadian and Cameroonian product ecosystem.

- Architected and supervised a high-traffic delivery ecosystem spanning nine applications across iOS, Android, and web.
- Managed cloud provisioning with Terraform and implemented API Gateway, unified authentication, and microservices routing.
- Led development of Spreeloop Pay and published public npm and Dart packages.
- Automated chatbot and service workflows with n8n and Python; established CI/CD and automated testing for app stores, Firebase, and Vercel.
- Built offline-first caching with PowerSync, developed Flutter and React interfaces, and mentored junior engineers.

Full-Stack Web Developer

March 2021 - October 2022

Umdeny | Yaounde, Cameroon

Delivered responsive web interfaces and backend services for business workflows.

- Developed responsive React interfaces with clean state management and cross-browser support.
- Designed secure REST APIs with Node.js and Express, and translated business requirements into database models.
- Deployed frontend applications to Vercel and backend services to Heroku.

KEY PROJECTS

Spreeloop Place, Partner & Courier

2021-2026

A cross-platform on-demand food and delivery ecosystem designed for intermittent mobile data, local Mobile Money, and French-first users. I architected and supervised nine iOS, Android, and web applications across customer ordering, merchant operations, and courier logistics.

Outcome: The production ecosystem launched in Douala with customer, merchant, and courier applications.

Spreeloop Pay

2024-2026

A managed payment platform for Orange Money, MTN Mobile Money, and bank cards, with a merchant dashboard, transaction and withdrawal tools, and a developer REST API with sandbox.

Outcome: The merchant portal and developer integration flow are live in production.

Eitel's Tours

2024

A bilingual, mobile-responsive web experience for private cultural journeys across Cameroon, with itinerary storytelling, a gallery, and a request-access inquiry flow.

Outcome: A live premium tourism site introducing the Royal Cameroon Experience to international guests.

Yengafrika

2024

A mobile-first marketplace for discovering and booking more than 300 tours and activities across Cameroon, with multi-currency checkout and tools for service providers.

Outcome: A live platform connecting travelers with bookable local experiences across Cameroon.

Place Bot

A bilingual Telegram food-ordering bot that extracts order details, confirms them with the customer, and creates orders through the Spreeloop API.

Outcome: Natural-language order capture in English and French, with confirmation and order creation.

TECHNICAL SKILLS

Mobile	Flutter Dart PowerSync MVVM / MVC Real-time geolocation Orange Money / MTN Money Stripe
Front End	React TypeScript JavaScript HTML5 CSS3 Responsive UI
Back End	Go Node.js Express Python REST APIs Microservices API Gateway
Data & Cloud	PostgreSQL MongoDB Atlas GCP Firebase PowerSync
DevOps, QA & Automation	Terraform Docker CI/CD Playwright Jest Flutter test n8n Git

EDUCATION

Bachelor's Degree in Computer Science

Oct 2015 - Sep 2018

African Institute of Computer Science (IAI) | Yaounde, Cameroon

Assessed by WES as equivalent to a Canadian bachelor's degree.
